

Hi! Thanks for wanting to give the *Save Our Seas* presentation. We are thrilled there are kids out there like YOU who are helping to save our oceans. Here is the information you will need to put on a great presentation to your class, school, scout troupe, sports team, church group, or anybody else who you think will listen.

Key Items to Know:

- The *Save Our Seas* presentation is a PDF document that can be shown on any computer using Adobe Acrobat Reader (which can be downloaded for free from www.adobe.com if you don't have it). There is also a separate animation file (FluffyAnimation.mp4) that you may be able to use in conjunction with Slide 30.
- Having your computer hooked to a projector works best for a strong and easy visual impact for your audience.
- The *Save Our Seas* script is a separate PDF document. Be sure and download this document as well. Take time to rehearse it several times before giving it to your group, so you are comfortable with all the words and information. Remember to speak slowly, so your audience can understand everything you are saying. Be energetic and have fun.
- The presentation is most effective when you can give students a *Think Ocean* card and *Seafood Watch Pocket Guide* at the end of the presentation. Our *Think Ocean* cards (PDF document) can easily be downloaded and printed (they are two-sided).
- You can call or email the Monterey Bay Aquarium Seafood Watch program and they will send you plenty of *Seafood Watch Pocket Guides* for your presentation. Here is the link: http://www.montereybayaquarium.org/cr/cr_seafoodwatch/download.aspx. If you go to the website listed above, click on the button "Want to order large quantity of pocket guides?", or you can call, 1-877-229-9990. Be sure and select the right guide for your area (there are 7 different guides to choose from).
- All documents mentioned above, except for the Seafood Watch Pocket Guides can be downloaded from: http://www.threeatsea.com/%22Save_our_Seas%22.html

We wrote this presentation because we absolutely believe that kids CAN make a difference in helping save our oceans. We have a vision that, over the next few years kids will give this presentation to kids in all 50 of our United States and in other countries as well. Thank you for helping us make that dream a reality. But more importantly, thank you for helping save the plants, animals and beauty of our oceans.

Otterly delighted,
Ayla and Simon

P.S. Be sure and drop us an email to let us know how it went. We'd love to know what state/country you are in; how many students you presented to; and what was the reaction. You can reach us at ayla@besemer.com and Simon at henrythefifth@mac.com.
